

Questions to promote reflective thinking

Before a learning engagement

What do you already know?

What would you like to know?

What do you expect you will learn from this lesson/session?

What do you notice?

During a learning engagement

What might you do next?

What questions/thoughts do you still have?

What are you wondering about?

What still puzzles you?

Can you connect this to something else?

After a learning engagement

What made you say that?

What helped you learn?

What might you do differently?

How could you use what you have just learned?

How might you explain to someone what you have just learned?

Why do you think you needed to think about this?
